

# Animal hoist

## About:

Simple to use, three-part animal hoist. Slides into your tow ball receiver. Makes butchering of your animals no longer back breaking. Has the ability to lift up to 200kg.

## How to use:

- Slide the bottom L frame into your tow ball receiver (optional bolt down stand available. \*May affect Warranty)
- Drop down the stabilizer leg to the ground
- Make sure you lock it in using the 8mm clip.
- Slide in the winch frame into the top of the L section
- Tighten the two locking nuts
- Plug the power lead into the Anderson plug of your car.
- To activate the remote: Hold on the two buttons until the light flashes red.

You are now ready to go!
